Principal's Report

Coles Vouchers

Mrs Rologas has accumulated over 70,000 vouchers from Coles to purchase sporting equipment. This equates to thousands of dollars' worth of sporting equipment. Thanks to everyone involved.

Aboriginal Education

This week students have been learning about our Aboriginal history and the concept of reconciliation. Yesterday 3/4W presented an outstanding assembly with strong messages about reconciliation. Well done.

Work on Aboriginal history and culture will continue as we move into NAIDOC. We also have Trisha Parker and Jennah Browning from Brunswick Heads Public School presenting at our professional learning meeting next week to share how they have embedded Bundjalung language and culture across their school.

School Safety

Parents/carers are encouraged to continue to discuss road safety with children. A community member reported a child running in front of their car to cross the road. Please reinforce safety crossing the road and ensure children enter and exit cars on the footpath side to avoid walking into traffic.

Farewell Jan Brownlow

After many years supporting students, families and staff, we will be farewelling Jan Brownlow, our school counsellor, as she moves into retirement. Jan's last day will be next Tuesday. I thank Jan for her service and support and wish her well in retirement. We have been blessed to have such an experienced, capable and compassionate counsellor working at our school.

Random School Inspection

Each year the NSW Education Standards Authority (NESA) conducts random inspections of 18 NSW public schools to ensure compliance with policy implementation. Last week I was contacted by NESA and on Tuesday, two inspectors visited our school to assess our compliance with policy in the areas of child protection and safety and supervision of students.

Thanks to the efforts of a team collating evidence, we were deemed fully compliant in all areas. Special thanks to Lisa McGivern, Mel Lengyel, Lee Yabsley and Jenny Furber for work compiling evidence, along with Jody Pearce, Sonia Woods, Erin Ensor and all staff for keeping things on track while we were caught up in the process.

Working Through Today's Ethical Dilemma's

Ethics classes for term 2 have started again this week and parents often wonder what topics their children are currently considering. Here's a snapshot.

In Stage 2 (Years 3-4 taught by Marnie and Ruth) they are currently Disagreeing Respectfully. What an important skill that is! We are not always going to entirely agree with our friends or partners, our children, our colleagues, on every issue. It's an important skill to be able to put forward a point of view, and the reasons behind it, and to take part in the give and take of reasoned argument in a respectful and considered way. Examples of the types of questions asked of student are: Should you always say if you disagree with someone's opinion? How can you disagree respectfully? What happens when you aren't respectful. The Primary Ethics curriculum is designed to encourage students to evaluate one another's views. We encourage students to engage in the process of reason giving, not just in support of their own beliefs, but also in voicing arguments that run counter to the views expressed by others. Students are encouraged to engage in critical dialogue, to voice disagreement – but not with the aim of one-upmanship or, as in a formal debate, to win a contest. Rather, the disagreement is to be seen as part of a genuinely collaborative process directed at understanding and progress towards truth. It goes without saying that shouting matches and 'put downs' are at odds with the process just described, and that is why one of the ground rules of ethics class is 'No put downs'.

Stage 3 (years 5-6 taught by Angela, Des and Isabel) are tackling two very different topics. Year 5 are starting with 'Fatalism', discussing 'What is fate?' and looking at what the Ancient Greeks thought about it and moving into questioning whether our actions, have a bearing on our future and if that means we are free to create our own destiny. It seems a natural human impulse to turn to the idea of fatalism when faced with what appear to be

overwhelming difficulties. We may say that what is happening is unavoidable, that there is nothing we can do to prevent it. If we don't get the job we really wanted, we may say "Oh well. It just wasn't meant to be."

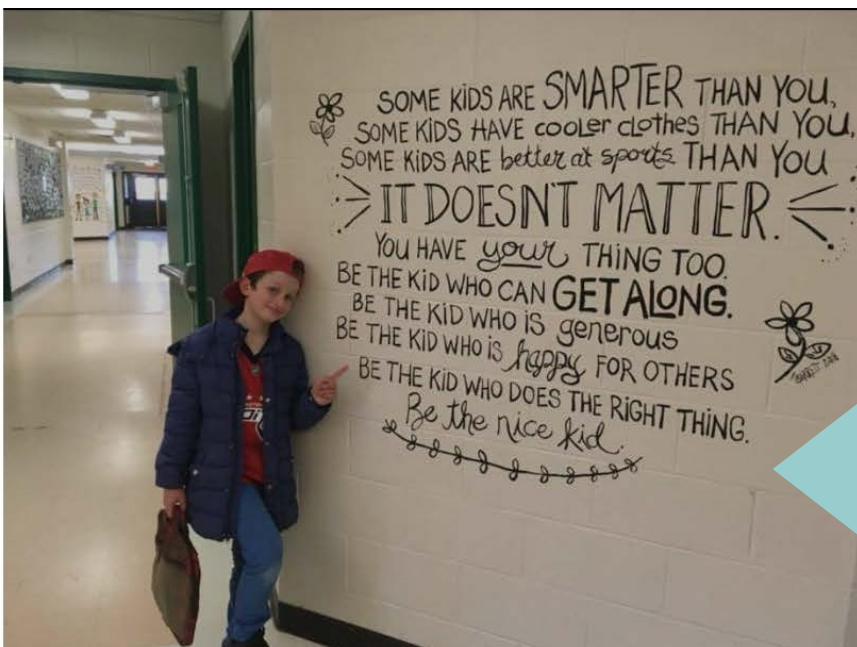

Year 6 are tackling important notion of human rights – what they are, where they come from and how they can be justified, and what obligations they impose on governments and citizens. And then we raise the question whether there are human rights that also extend to those animal species closest to us, namely the other great apes. And we ask, 'If there are, should these rights be protected in law and which animals do we choose to protect and why?

Lesson 1 begins with the story of Nim Chimpsky, a chimpanzee born in a US research facility and raised by scientists. He was the subject of an experiment to determine whether chimps are capable of learning human (sign) language. When the experiment finished, Nim was relegated to a solitary existence in captivity. Of course, if a human were to be treated like this we would condemn the treatment as a violation of fundamental human rights; rights that are enshrined in US law. In response to cases such as Nim's, in 2008 the Spanish government granted certain human rights to chimpanzees and the other great apes. This tale provides the backdrop for the topic's big questions.

At OSPS Primary Ethics offers classes in years 3-6. Currently we are unable to offer classes in other years as there are not enough Ethics Teachers to cover all the interested students. If you or someone you know is interested in becoming an Ethics Teacher please go to www.primaryethics.com.au (click the volunteer tab, then click Teach Ethics) and submit an application.

Social Media - Tips For Parents

Don't tag photos of your children at their school if your accounts are not set to completely private. This is a child safety issue as anyone driving past can search the school on Instagram and see all of the photos that have been tagged at the school, often by parents who have not set their account to private on Instagram. If your account is not completely private, anyone can see your photos of your child, their name, the name of the cat, where you go on holiday, what your family does on weekends, when birthdays were and other information about your family and your life. Therefore, a complete stranger could make up a story that could be very convincing to your child by using the information you have shared in a public forum of more than 500million users.

Consider the fact that children in the background of photos or videos you take at your child's school may be on "no publish" lists. Some children are in protective custody or witness protection and an innocent photo posted on social media could be disastrous.

Make sure the young people in your care know that under no circumstances they should go and meet up with anyone they meet online. Stranger Danger rules apply because they are now literally on digital steroids 24x7.

For more information about cyber safety please visit

<https://www.safeonsocial.com/>

STUDENT DESIGN COMPETITION!

We are having a competition for students to design tickets for our concert, "Under the Big Top."

The winner will have their ticket design printed on the tickets and will receive a complementary family pass for the big night performance.

Date: Thursday 9th August, 2018

Time: 10am to 6pm

Location: Ocean Shores Public School Hall

Price: Adults \$10 Children \$5

Dimensions for the design should be 105mm x 148mm and students can view examples of past tickets.

All entries are due to the office by Friday 8th June, 2018 (week 6)

3/4T Sensational Science Experiments

Students from 3/4T have recently been engaged in hands-on science experiments that create change or chemical reactions.

Gypsy and dad Flynn demonstrated the experiment referred to as 'Elephant's Toothpaste'.

Look at the before and after! **THICK, FOAMY, PINK TOOTHPASTE OOOZED OUT OF THE VOLCANO!**

They mixed concentrated hydrogen peroxide with liquid soap. They then added a catalyst to make the hydrogen peroxide break down really quickly. Hydrogen peroxide breaks down into oxygen and water. There's a lot of oxygen trapped in peroxide, so this rapid decomposition resulted in lots of oxygen that needed to quickly push out of the container. As the peroxide broke down, the soap that was mixed in combined with the water (from the break down process), and turned into foam. The oxygen gushing out is what makes the soap bubbles move. Pink food colouring was added before the catalyst, which made the resulting column of foam that gushes out look even more like toothpaste.

Clancy showed the class the 'Lava Lamp' experiment. A combination of oil, water and blue food colouring is placed in a bottle. The lid is removed, an Alka-Seltzer dropped in and the lid closed again. The Alka-Seltzer reacts with the water to produce carbon dioxide gas bubbles. These stick to the water droplets. ... At the top, the gas bubbles pop

and escape into the air, allowing the dense water to sink back to the bottom again. With the addition of the blue food colouring, a lava lamp effect is created. Amazing!

Juliette and dad Jo demonstrated 'Flaming Lemonade', an interesting experiment involving lighting a match in a bottle of tap water and then in a bottle of lemonade. In the fizzy water the match remained alight for a longer period of time. Why did this happen? The chemical reaction formed a smoky cloud in the top of the bottle. Clouds are formed when water droplets in the air cool and then collect on dust particles. In this demonstration, the dust particles were provided by the smoke from the match. The air inside the bottle was cooled by releasing the pressure after the bottle was squeezed. The temperature is changed by squeezing the bottle: the amount of air within the bottle is constant, but squeezing the plastic bottle changes the volume of the gas. Expanding the bottle causes a lowering of the air temperature – in this case, enough to cause the water gas to form a liquid – the cloud. Magic!

Throughout these experiments students were engaged in the scientific process of following a procedure, predicting what would happen, forming explanations for the chemical reactions and questioning how they could change the experiment next time based on questions that arose.

Students in 3/4T agreed that Science is 'So Much Fun!'

"hands-on

science

experiments

that create

change or

chemical

reactions."

Seeds Please!

Stage 3 are going to take part in the construction of a berry and chilli farm this term. The garden is in need of seeds. We would like you to donate all sorts of berry and chilli seeds. All you have to do is dry out the seeds you would like you to donate from you're plant, next, can you put them in an envelope, label them clearly with the date and the plant name. Then we would like you to place them into a box in the office labelled "Seed Box".

Ocean Shores Public School 25th Anniversary & 1988 Billinudgel School Time Capsule Opening!

On May 9th 1988, Billinudgel Public School's time capsule was sealed by the North Coast Director of Education, Lionel Phelps. Instructions were left to open the time capsule in thirty years - on May 9th 2018. Unfortunately, we missed the special event so the capsule remains sealed.

We have rescheduled to official opening of the 1988 Time Capsule to coincide with 25th anniversary celebrations of Ocean Shores Public School.

The invitation to join us for this historic day is extended to all former members of staff, students and their families.

PLEASE RSVP BY:

7th July, 2018

CONTACT:

Ballina Byron Family Day Care

What is family day care?

Imagine your child in a small group of no more than four or five pre-schoolers, playing, learning and having fun with an educator they know and trust.

This close relationship is valued by over 100,000 discerning families who enrol their children in family day care while they work or study.

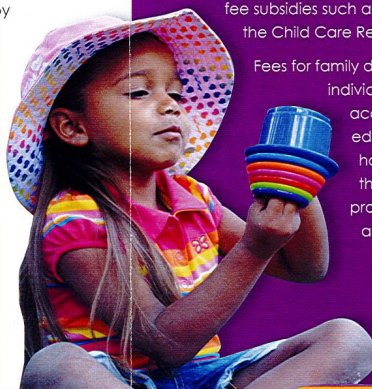

Today's working environment is no longer the traditional 9 to 5 routine – so flexible child care and education that meets the needs of modern families is a must.

Family day care caters for young babies through to pre-teens and can offer care during standard hours, before/after school, during school holidays and in some circumstances overnight and weekends.

Educators work in partnership with a local family day care scheme which is either run by a community group, local government or is privately operated.

They are regularly visited by trained scheme staff that monitor the children's progress and provide support, resources and ongoing training in contemporary child care and education practice.

Family day care is a quality home based child care and education service that's been actively working in partnership with Australian families for over 30 years

Standards and fees

All educators are skilled, experienced and highly trained; many hold formal qualifications ranging from Certificate III to university degrees.

Family day care operates under a framework of state regulations and national standards that ensure the child care environment is safe and children receive quality care. The National Childcare Accreditation Council (NCAC) governs the family day care quality assurance system. For more information visit www.ncac.gov.au.

Educators need an up-to-date first aid certificate, police check, working with children check, insurance, and their home needs to meet safety standards.

Families can apply for the full range of child care fee subsidies such as Child Care Benefit and the Child Care Rebate.

Fees for family day care are set by the individual educators and may vary according to location, the educator's qualifications, the hours of care and the age of the child. Educators may also provide food, nappies and transport.

Why choose family day care?

Family day care's main point of difference is the small group setting where each child is treated as an individual, and daily experiences are tailored to each child's developmental stage and interests.

No other formal child care service offers such high educator to child ratios (either 1:4 or 1:5 depending on the state/territory) – and this, together with flexible hours, consistency of one primary educator, affordable rates and generous fee subsidies and a strong regulatory framework – makes family day care a unique child care and education option.

So if you are working or studying, and want excellent child care and education for your child, consider family day care. It is the only accredited child care service that enables your child to learn and grow with a small group of other children in a secure family home with one professional educator.

Home interviews are available
